

INTERNSHIP (F/M)

FOR CARBON COMPOSITES
in Taufkirchen next to Munich

As a **young spin-off** of TU Munich, we develop and produce **components out of CFRP** for our customers in the **automotive, aerospace and mechanical engineering** sectors. Our **high-performance manufacturing process** (Carbon-SMC) enables us to efficiently produce **highly complex** components in **large quantities**, and thus we shape the lightweight market of the future.
