

WORKING STUDENT (F/M)

FOR CARBON COMPOSITES
in Taufkirchen next to Munich

As a **young spin-off** of TU Munich, we develop and produce **components out of CFRP** for our customers in the **automotive, aerospace and mechanical engineering** sectors. Our **high-performance manufacturing process** (Carbon-SMC) enables us to efficiently produce **highly complex** components in **large quantities**, and thus we shape the lightweight market of the future.

YOUR TASKS

- You produce components out of CFRP and work on the optimization of the manufacturing process
- You support our engineers in their daily businesses and take over responsibility for sub-projects
- You support our mold making department in the production and assembly of pressing tools

YOUR PROFILE

- Bachelor or Master student in mechanical engineering or comparable (at least 4th term)
- Technical understanding, basic knowledge of composites and skilled craftsmanship
- Quick comprehension and a hands-on-attitude
- Inspirable / curious / strive for a steep learning curve

WHAT WE OFFER

- Varying tasks in a fast growing business
- Startup atmosphere and a highly motivated team
- Weekly veal sausage breakfast
- Your foundation for an exciting career

Sounds interesting? Then we look forward to getting to know you. You don't have to write a cover letter. We prefer to spend this time in a personal conversation with you. Just send your CV via e-mail to: karriere@blackwave.de
